Visual Studio Code interface showing a project named "db.json - EventManagement". The Explorer sidebar on the left lists files under "EVENTMANAGEMENT", including "signin.component.html", "signin.component.spec.ts", "app-routing.module.ts", "app.component.css", "app.component.html", "app.component.spec.ts", "app.component.ts", "app.module.ts", "assets", "environments", "favicon.ico", "index.html", "main.ts", "polyfills.ts", "styles.css", "test.ts", "browserslistrc", ".editorconfig", ".gitignore", "angular.json", "db.json", "karma.conf.js", "package-lock.json", "package.json", "README.md", "tsconfig.app.json", "tsconfig.json", and "tsconfig.spec.json".

The main editor displays the content of "db.json", which is a JSON file defining a database structure for "posts". The JSON content is as follows:

```
1 {
2   "posts": [
3     {
4       "id": 9,
5       "firstName": "ankit",
6       "lastName": "sindu",
7       "email": "ankit@gmail.com",
8       "mobile": "123456780",
9       "salary": "60000"
10    },
11    {
12      "id": 10,
13      "firstName": "baljeet@gmail.com",
14      "lastName": "baljeet@gmail.com",
15      "email": "baljeet@gmail.com",
16      "mobile": "9781111111",
17      "salary": "444"
18    }
19  ],
20  "comments": [],
21  "profile": {
22    "name": "typicode"
23  }
24 }
```

The bottom panel shows the TERMINAL output, displaying API test results:

```
GET /posts/200 30.866 ms - 491
PUT /posts/10 200 29.816 ms - 162
GET /posts/200 38.388 ms - 491
DELETE /posts/11 200 30.079 ms - 2
GET /posts/200 27.999 ms - 336
```

The status bar at the bottom indicates the file encoding is UTF-8, line feed (LF), and JSON format. The system tray shows the temperature is 25°C, network speed is 3.8 Kbps, and the date is 22-09-2022.
