

Building A Restaurant Website With Bootstrap

About :

You are a web developer at a service-based web development company called Kite Technologies. The company has been approached by a client who wants to build a website for their restaurant named Ming's Diner. The website should provide the users a brief overview of the restaurant and its bestsellers, its address, as well as an option to contact the restaurant. During sprint planning, you agree to lead this project and develop the website.

Installation Guide:

1. GitHub link: <https://github.com/baljeet-singh97/JAVA-Projects/tree/main/Phase%204/Building%20A%20Restaurant%20Website%20With%20Bootstrap>
2. Download the entire project as Zip in local system.
3. import the project in Eclipse IDE or Visual Studio.
